What’s the Conventional Wisdom About POHCA Today?
Pediatric Out-of-Hospital Cardiac Arrest (POHCA):

- Grim Survival Chances Nationwide
- POHCA Intimidating for Most Rescuers:
  Infrequent Use of Pedi ALS Skills, Volatile Setting, Psychological Challenge, Kids Often Easy to Carry ...

- As a Result:
  Scoop & Run Practices Have Evolved
In Addition ...

- Conventional Wisdom: “Don’t Intubate”
- “Respiratory” Cause -- Focus on Breathing
- So Routinely See R.R. >> 6 / minute
- First Dose of Epinephrine Delayed
What Would Happen If We Now Focus on Rapid On-Scene Care…

.... and Use Physiologically-Appropriate Ventilatory Techniques for Cardiac Arrest?
Methods (cont.)

**Interventions:**

- **2012:** Traditional POHCA Care (i.e. very limited scene time)
- **2014:** Prioritized On-Scene Resuscitation (phase I $\Delta$’s) that Expedited Drug Delivery via Direct I-O & Intubation (controlled ventilation rates $\sim$6/min)

*The modified training included psychological and skills-enhancing tools to provide greater confidence in providing on-scene care.*

- **2016:** Began Techniques to Dose/Prepare Drugs Before Arriving On-Scene (phase II $\Delta$’s)

….. No other relevant modifications were made system-wise.

Original Investigation

Early On-Scene Management of Pediatric Out-of-Hospital Cardiac Arrest Can Result in Improved Chances for Neurologically-Intact Survival

ABSTRACT

Aim: To evaluate the frequency of neurologically-intact survival (SURV) following pediatric out-of-hospital cardiac arrest (POHCA) when comparing traditional early evacuation strategies to those emphasizing resuscitation being performed on-scene.

Conclusions

Although a historically-controlled study…

The Sudden and Sustained Appearance of Neuro-Intact Pedi Cardiac Arrest Survivors …

…Was Profound, Immediate & Rewarding

Much of this Appeared to be Attributable to:

Techniques That Expedited Care and a Disciplined Focus on Physiologically-Sound Respiratory Management and System-1 Thinking for Rapid Medication Dosing
On the Road to the 2020’s …
THE DEAD SHALL BE RAISED.
You mean you're still ALIVE!?
We’ll Make Life Better for Future Generations...
